DETAILED ACTION

Claims 1-13 are pending in the application.

Election/Restrictions

Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-5, 8, 9 and 11, drawn to products, classified in class 548, subclass 202+.
- II. Claim 6, drawn to a process of making, classified in class 548, subclass 202+.
- III. Claim 7, drawn to a process of making, classified in class 548, subclass 202+.
- IV. Claim 12, drawn to a process of making, classified in class 548, subclass 202+.
- V. Claim 10, drawn to a process of making, classified in class 560, subclass 1+.

VI. Claim 13, drawn to products, classified in class 548, subclass 152+.

The inventions are distinct, each from the other because of the following reasons: the processes of Groups II, III, IV and V are patentably distinct because each process requires different reaction conditions utilizes different patentably distinct starting materials and/or produces patentably distinct products. The products of Groups I and VI differ materially in structure and element so much so as to be patentably distinct. In addition, a reference that anticipates one group may not even render obvious the other.

Inventions of Groups I and VI and Groups II, III and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially

different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process.

Because these inventions are distinct for the reasons given above, and the search required for Group I, for example, is not required for Group V, restriction for examination purposes as indicated is proper. Therefore, it would impose an undue burden on the Examiner and the Patent Office's resources to examine the instant application if unrestricted.

The above groups themselves are inclusive of patentably distinct subject matter. Accordingly, along with the election of one of the above groups, the following action is also taken.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (e.g., Example number, page number and structural

depiction) from whichever group is ultimately elected, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the election of a single disclosed species (e.g., Example, page number and structural depiction), a generic concept, inclusive of the elected species, will be identified by the Examiner for examination. Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon from the elected group.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura L. Stockton whose telephone number is (703) 308-1875. The examiner can normally be reached on Monday-Friday from 6:00 am to 2:30 pm. If the examiner is out of the Office, the examiner's supervisor, Joseph McKane, can be reached on (703) 308-4537.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1235.

The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.
